Welcome

While exploring the bizarre phenomena occurring across the online ecosystem, we discovered that they were particularly prevalent in public Wi-Fi zones. Thus, we established a temporary Base-Camp in the heart of Seoul, where numerous public Wi-Fi stations are populated. Here, you will gain access to various information, taking a step towards the truth. The dispersed information eventually leads to one location.

We must capture 'it', which surrounds us.

※ What is a Hot-spot?

Generally, it means the following: [1) areas that support wireless network service, 2) areas of abnormal isotope concentration upon injection, based on nuclear medicine scanning imagery, 3) contested regions.] Here, the term 'Hot-spot' may be interpreted as the combination of all three.

Viewing sequence

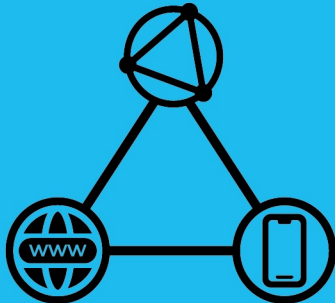

Find the clues about '☒☒☒☒' around the foldable moving booth located in the center of the Base Camp. Connect the mobile phone in your hand to Wi-Fi, and download the Exploration-App. At some point, you will need to step outside. Follow the guided path on the app, and experience the moment of overlapping time and space.

Hot-spot Base Camp

We have temporarily occupied a physical space in Jung-gu, Seoul, a physical region subject to the highest frequency of abnormal phenomena lately.

The Truth-Website

An online space for people who are unable to visit the physical space.

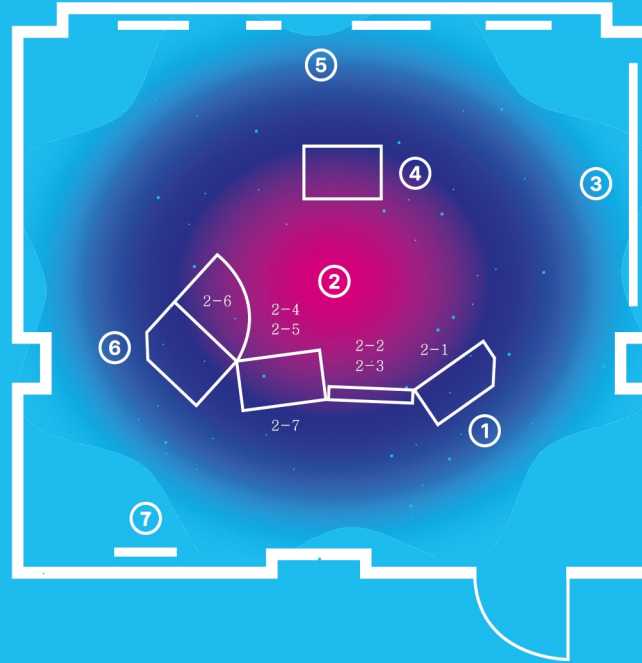

The Exploration-App

A tool for the capturing '0000' that uses the mechanism of overlapping physical and online space.

These three areas that connect different times and spaces share the phrase 'capture the truth of Hot-spots'.

Base Camp Info

1 Self Help Desk

Speaker, brochure
You can receive guidance on visiting the Hotspots Base Camp.

2 Portable moving booth for Hot-spots research

- 2-1) AT-CWA_1.1.
Capture-Signal generating antenna, switching hub, LAN cables, router, broadband amplifier
- 2-2) Its nutrients
66 online shopping mall captured images, play in a loop
- 2-3) It started a long time ago.
Film viewer, film reels, modified anthropometry and product advertising image
- 2-4) Truth
Website
- 2-5) Occurrence, Spread, Hiding
00:00:22, loop
- 2-6) Printout
printed materials
- 2-7) Real-time energy measurement device
Bioenergy detection sensor, mobile phone

3 Reserch Map of Hot-spots in Seoul

A note on the Seoul public Wi-Fi open data visualization map
1914 × 2322(mm)

4 Cabinet for Engineering Portable Capture-Signal Enhancing Device

Collected old furniture, multi-media materials, variable size

5 Found drawings

4 pieces of drawings found

6 Moment of Temptation

1-channel video, color, stereo sound,
00:08:54, loop

7 Design Plan for Generating Capture-Signal

Printout, mirror,
364 × 515 × 130(mm)

Exploration-App

Capturing 'it' is not an easy task. Various Wi-Fi signals must be collected and overlapped to generate special signals. At a proper moment, a 'gap' is created. Excessive overlapping signals will block that gap, so use caution. 'Ftotal(x,t) = Σ i=1n Fi(x,t)' This is the equation we have discovered. The Exploration-app and device were created based on this equation. The gap between the virtual and the real, the future and the past, the offline and the online; out of the noise generated from the gaps, 'it' - the collection of countless object data - is generated. Dividing endlessly.

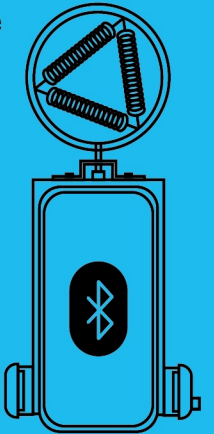

Seize this opportunity to capture '☒☒☒☒'!

※ Scan the QR code to download the App

Capture-Signal enhancing Device

This is *c.0.3A*, a mobile device that can be used in conjunction with the 'Exploration App'. This is an abbreviated version of the Capture-Signal generating antenna AT-CWA_1.3. It can enhance the special signal used to capture '☒☒☒☒'. Install this device to your mobile phone and use it in conjunction with the app to increase your chances of capture. Apply to the 'Onsite Exploration of Hot-spots' organized every Saturday to use this device, free of charge!

※ See the back of the page to check the application information

The Truth-Website

Was your exploration a success? Or was it a failure? In either case, do not be disappointed; the opportunity to approach the truth still remains. If you remain strictly online, much of the parts will remain hidden and distorted. Look through our collection of interesting stories here! This is also where you may apply for a chance to take part in 'onsite explorations' organized offline.
